

## Customize Clover for Your Restaurant

Running a full-service restaurant can be challenging, but Clover makes it easy. With Clover's App Market, you have access to an array of apps that can help make your business more efficient and profitable. Full-service restaurants of all sizes can benefit from the following Clover applications:

### RecipeGo w/ AllergyPro

This is an easy to use, recipe management application, with a fast allergy search function. RecipeGo is your personal digital cookbook, which gives you the ability to add recipes on the go. Integrated private function prevents others from seeing them. It also quickly searches your recipe database by ingredient, reducing the risk of guests with food allergies eating something they shouldn't.

### Smart Coupons

Smart Coupons gives you the power to print supermarket receipts directly from your Clover Station. Easily print QR codes on your customers' receipts for future discounts.

### Tables

Tables helps you boost efficiency with table management at your restaurant. It allows you to assign tables to servers and manage table ordering, printing and paying. You can even start bar tabs with the simple swipe of a credit card. This free app is a must for any full-service restaurant.

### WaitlistMe

WaitlistMe is a simple way to manage your wait list and reservations. You can easily and quickly add, notify and check off customers and parties. Notify customers when it is their turn with texts and automated calls. With WaitlistMe, you'll get unlimited free notifications, quote estimates, guest loyalty tracking and more.
