

Plug in marketing WiFi

Market like the Fortune 500s - with WiFi as your marketing advisor.

Secure networks & transactions

Take yourself off the "easy to hack" map with enterprise-grade transaction security.

Collect emails from everyone

Build your email database 24/7 with a WiFi that consistently increases customer spending.

Spread social credibility fast

Sit back and collect endorsements as loyal WiFi users start conversations about you all over Facebook.

Deliver targeted emails automatically

Bring back old customers after periods of absence by triggering emails with pre-made templates.

Set rewards on auto pilot

Boost sales with WiFi-delivered incentives that reach even those that didn't plan on buying today.

15 minutes of setup and the marketing runs itself

Step 1: Plug in your router and instantly build your database

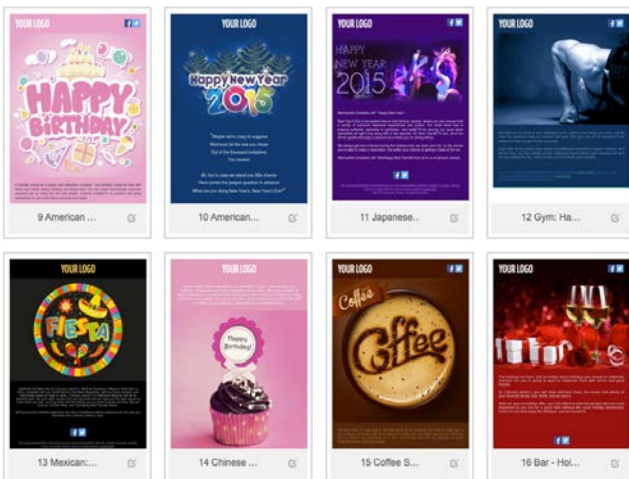

Collect emails, Facebook likes and check ins with zero effort. WiFi builds your database and social followers with a little help from your (WiFi) friends.

Step 2: Automate all emails and bring everyone back

Sign into your online account to automate birthday emails, rewards and incentives for long-absent customers. They're always bringing people in - even when you're on vacation.

Step 3: Launch buying incentives and drive transactions from total strangers

Automate promotions over your WiFi by choosing from already-made content and templates. Just tell the router to spread it to in-store customers and watch yourself go viral on Facebook as people share with friends.

Market like the business you want to become
